Part III DETAILED ACTION

This office action is in response to filing of the application on November 24, 2003.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

**** Group I, Claims 1-7, drawn to a CMP polishing method, Class 438, subclass 691.**

**** Group II, Claims 8-10, drawn to an apparatus, classified in Class 451, subclass 288.**

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, hand dressing the polishing pad with the dresser at low pressure, or the apparatus can be used for abrading a disk.

Because these inventions are distinct for the reasons given above and have acquired a separate status as shown by the above different classifications and as given in the above examples, the fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.
